

SoniCord™

POWER FAILURE ALARM CORD

- Unique power failure cord will sound a loud 80dB alarm when the power fails to any connected 120V appliance for any reason including circuit breaker nuisance tripping.
- Perfect for: Refrigerators, Freezers, Sump Pumps, Aquariums and More...
- Convenient on/off switch.
- Built-in rechargeable battery provides up to 2.5 hours of alarm.
- Retaining straps help hold appliance plug in place.

The **SoniCord** is a unique 16-inch cord with a built-in power failure alarm. It is designed to monitor essential 120 volt cord-connected appliances for accidental cord disconnect, circuit breaker failure or power outage. The **SoniCord** is perfect for use with: freezers, refrigerators, dehumidifiers, aquariums, sump pumps, wine cellars and much more. When the cord leading to any of these devices is disconnected, or loses power for any reason, a loud 80dB signal sounds for up to 2.5 hours.

Simply plug the **SoniCord** into any 120V outlet and plug the appliance to be monitored into the **SoniCord**. Use the hook and loop straps to hold the appliance plug into the **SoniCord**.

The **SoniCord** is rated at 15A at 120VAC. For indoor use only.
