

SoniCord™

POWER FAILURE ALARM CORD

- Unique power failure cord will sound a loud 80dB alarm when the power fails to any connected 120V appliance for any reason including circuit breaker nuisance tripping.
- Perfect for refrigerators, freezers, sump pumps, aquariums, dehumidifiers, wine cellars, power strips and more...
- Convenient on/off switch.
- The built-in rechargeable battery provides an alarm of up to 2.5 hours.
- Hook and loop straps retain appliance plug.

The *SoniCord* is a unique 17-inch cord with a built-in power failure alarm. It is designed to monitor essential 120 volt cord-connected appliances for accidental cord disconnect, circuit breaker failure or power outage. When the cord connected to any appliance is disconnected or loses power for any reason an alarm sounds, at over 80dB, for up to 2.5 hours.

Simply plug the *SoniCord* into any 120V outlet and plug the appliance to be monitored into the *SoniCord*. Use the hook and loop straps to hold the appliance plug into the *SoniCord*.

Easy to install...
no tools necessary.

The *SoniCord* is rated for 15A at 120VAC and is for indoor use only.
